Introduction

- a personal assets system designed to simplify and streamline the management of your personal belongings.
- Say goodbye to forgotten loans and hello to seamless asset tracking...with PAMS, you can effortlessly keep tabs on your stuff (whether it's books, tools, or electronics) and ensure timely returns.

PAMS transforms the way you manage your personal belongings, making life easier for everyone involved.

System Diagram

Project features

- **Transaction Tracking**
- **Reminder System**
- **Automation and Real time status**

- 01 Users interact with a simple and intuitive Graphical User Interface (GUI) to add, view, and manage their personal belongings.
- 02 The backend manages a database containing user details, item information, and transaction records, ensuring secure storage and retrieval of data.
- 03 The system tracks transactions, logging borrowed items, due dates, and returns. Dues are automatically calculated based on borrowing duration.
- 04 Automation ensures seamless coordination between the GUI, backend, and database. Users receive alerts, keeping them informed and promoting responsible borrowing and timely returns.
